

# Francesco Occhipinti

---

**INTRODUCING MYSELF** I am a passionate developer, aiming mainly at developing visualization interfaces for the web

**EXPERIENCE** I studied computer science thoroughly during my years of University. I worked as backend developer on a transaction infrastructure, then i worked as frond end developer specialised in data visualisation

**WORK METHODOLOGY** I am a fan of test driven development. This methodology offered me surprising results both in a backend as well as in a frontend environment. I am also a fan of free software. I think that normally it would be smart for a company to keep closed just a small part of it's code, as working on free software improves many aspects of the development process. Lastly, i am a fan of simple solutions, oriented by the user needs.

**CHRONOLOGY**

|   |                    |
|---|--------------------|
| <b>Frontend developer at Deltamethod</b>  | <b>2013 — now</b>  |
| <b>Backend Python/Perl developer at Dada.net</b>  | <b>2011 — 2012</b> |
| <b>Master degree in Computer Engineering</b> , at the Pisa University   | <b>2006 — 2010</b> |
| Curriculum "Networking and Multimedia". For my degree I defended a thesis on web technologies, writing a shared web whiteboard with vectorial graphics and taking care of Explorer compatibility through the SVGWeb library. Final score: 108/110 |                    |
| <b>Linux system administration course</b> at Ephestus, in Catania   | <b>2006</b>        |
| <b>Bachelor degree in Computer Engineering</b> , at the Pisa University   | <b>2001 — 2005</b> |
| Final internship at the "Uplink" web agency, where I developed an internal CRM with ASP and ASP.NET. Final score 110/110  |                    |

**SOME TECHNOLOGIES I LIKE TO USE**

👉 d3   👉 git   👉 backbone   👉 django  
👉 coffe- & java- script   👉 less   👉 jade   👉 mocha  
👉 bash   👉 jasmine-jquery   👉 grunt   👉 require.js  
👉 node.js   👉 gevent   👉 pandas   👉 ...

**GENERAL INFORMATION AND CONTACTS**
