

Francesco Occhipinti

INTRODUCING MYSELF I am a developer passionate about free software, data visualisation and functional programming

EXPERIENCE I studied computer science thoroughly during my years of university. I worked as backend developer on a transaction infrastructure, as frontend developer specialised in data visualisation, and as a full stack developer building a whole application from the wireframes to the services. Since when i started freelancing, roles became less and less adequate to describe my work

WORK METHODOLOGY I am a fan of simplicity and essentiality. I always try to clarify problems before, around and beyond the software i write. I also care a lot about having an open attitude, sharing and contributing to free software

CHRONOLOGY

Freelancing	since 2015
Full stack, innovation developer at Sourcefabric	2014
Data vis and frontend developer at Deltamethod	2013
Backend developer at Dada.net	2011 — 2012
Master degree in Computer Engineering, at Pisa University	2006 — 2010
Final score: 108/110	
Linux system administration course at Ephestus, in Catania	2006
Bachelor degree in Computer Engineering, at Pisa University	2001 — 2005
Final score 110/110
