

Francesco Occhipinti

INTRODUCING MYSELF I am a passionate developer, aiming mainly at developing visualization interfaces for the web

EXPERIENCE I studied computer science thoroughly during my years of University. I worked as backend developer on a transaction infrastructure, then i worked as frond end developer specialised in data visualisation

WORK METHODOLOGY I am a fan of test driven development. This methodology offered me surprising results both in a backend as well as in a frontend environment. I am also a fan of free software. I think that normally it would be smart for a company to keep closed just a small part of it's code, as working on free software improves many aspects of the development process. Lastly, i am a fan of simple solutions, oriented by the user needs.

CHRONOLOGY

Frontend developer at Deltamethod	2013 — now
Backend Python/Perl developer at Dada.net	2011 — 2012
Master degree in Computer Engineering , at the Pisa University	2006 — 2010
Curriculum "Networking and Multimedia". For my degree I defended a thesis on web technologies, writing a shared web whiteboard with vectorial graphics and taking care of Explorer compatibility through the SVGWeb library. Final score: 108/110	
Linux system administration course at Ephestus, in Catania	2006
Bachelor degree in Computer Engineering , at the Pisa University	2001 — 2005
Final internship at the "Uplink" web agency, where I developed an internal CRM with ASP and ASP.NET. Final score 110/110	

SOME TECHNOLOGIES I LIKE TO USE

☞ d3 ☞ git ☞ backbone ☞ django
☞ coffe- & java- script ☞ less ☞ jade ☞ mocha
☞ bash ☞ jasmine-jquery ☞ grunt ☞ require.js
☞ node.js ☞ gevent ☞ pandas ☞ ...
