

Francesco Occhipinti

INTRODUCING MYSELF I am a developer passionate about free software, data visualisation and functional programming

EXPERIENCE I studied computer science thoroughly during my years of university. I worked as back end developer on a transaction infrastructure, as front end developer specialised in data visualisation, and as a full stack developer building a whole application from the wireframes to the services

WORK METHODOLOGY I am a fan of test driven development. This methodology offered me surprising results both in a backend as well as in a front end environment. I also care a lot for free software. I think that normally it would be smart for a company to keep closed just a small part of its code, as working on free software improves many aspects of the development process. Lastly, i love simple solutions, oriented by the user needs

CHRONOLOGY

Freelancing	2015
Full stack developer at Sourcefabric	2014
Front end developer at Deltamethod	2013
Back end developer at Dada.net	2011 — 2012
Master degree in Computer Engineering , at Pisa University	2006 — 2010
Curriculum "Networking and Multimedia". For my degree I defended a thesis on web technologies, writing a shared web whiteboard with vectorial graphics and taking care of Explorer compatibility through the SVGWeb library.	
Final score: 108/110	
Linux system administration course at Ephestus, in Catania	2006
Bachelor degree in Computer Engineering , at Pisa University	2001 — 2005
Final internship at "Uplink" web agency, where I developed an internal CRM with ASP and ASP.NET.	
Final score 110/110	

LANGUAGES I COMMONLY USE  javascript  python  haskell

SOME TECHNOLOGIES I LIKE TO USE  d3  angular  django  bacon  couch  sails  nix  less  mocha  bash  node  make  ...
