

Francesco Occhipinti

INTRODUCING MYSELF I am a developer passionate about free software, data visualisation and functional programming

EXPERIENCE I studied computer science thoroughly during my years of university. I worked as back end developer on a transaction infrastructure, as frond end developer specialised in data visualisation, and as a full stack developer building a whole application from the wireframes to the services. Since when i started freelancing, labels became less and less adequate to describe my role

WORK METHODOLOGY I am a fan of simplicity and essentiality. I always try to clarify problems before, around and within the software i write. I also care a lot about having an open attitude, sharing and contributing to free software

CHRONOLOGY

Freelancing	since 2015
Full stack, innovation developer at Sourcefabric	2014
Data vis and frontend developer at Deltamethod	2013
Backend developer at Dada.net	2011 — 2012
Master degree in Computer Engineering, at Pisa University	2006 — 2010
Final score: 108/110	
Linux system administration course at Ephestus, in Catania	2006
Bachelor degree in Computer Engineering, at Pisa University	2001 — 2005
Final score 110/110	

LANGUAGES I COMMONLY USE  javascript  python  haskell  purescript

SOME TECHNOLOGIES I LIKE TO USE  d3  react  angular  django  bacon  couch  sails  nix  less  mocha  bash  node  make  ...
